

# Identifying Mobile Meth Lab Waste

- Flammable solvent containers
- Boxes of battery fluid
- Drain opener, muriatic acid, or lye
- Large quantities of glass and plastic containers, buckets, plastic hose
- Discarded coolers (do not open!)
- Propane tanks with painted or corroded brass fittings
- Paper Towels and/or coffee filters with unusual stains
- Trash bags with ammonia odor
- Common cold pills or diet pills containing ephedrine or pseudoephedrine
- Iodine, Hydrogen peroxide, isopropyl alcohol
- Homemade pipe fittings on tanks

**If found do not touch them as they can still be active and potentially explosive!**

**IF YOU FIND OR THINK YOU HAVE COME IN CONTACT WITH A MOBILE METH LAB,  
PLEASE NOTIFY KCSO at (865)-215-2243 or KPD at (865)-215-7212**
